# NO HOPE OF **ACTIVITY**

Market Continues in Hopeless Condition and No Movement in Prices.

## CROP REPORTS FAVORABLE

Late Recovery in Ontario and Western Produced Little Effect.

(By Associated Press.)

NEW YORK, June 7.—The professional contingent in the stock market started to-day with very discouraging yiews of the hopes of any activity in the market or of any movement of prices. The fall-ure of the market to show any response to yesterday's decided movement in Ontario and Western was made the basis for this hopelessness, and the reflection of realizing sales in the early one-point decline in that stock aggravated the depressed sentiment. But the market turned out better in tone and in distribution of business than was the case under the stimulating influence of yesterday's rise in Ontario and Western. It would be difficult to fix upon a specific cause for this development, as the current news seemed to have ilittle influence on the market.

The weekly bulletin on the crops of the weather bureau proved rather more ravorable than was expected on wheat for both the winter and spring crops, and the favorable progress of the cotton crop want to accentuate the effect of the government report of the June first condition of crop.

A late recovery in Ontario and Western to-day produced more effect elsewhere in the market than did yesterday's more sensational advance, and the kindred coalers were especially affected.

Prices cused off in the final dealings, but the closing was steady. The bond market was irregular, with weak spots amongst the lower grade broke. Total sales, par value, \$1,145,000. United States bonds were unchanged on call.

Weekly Weather Report,

WASHINGTON, D. C., June 7.—The
Weather Bureau's weekly summary of

WASHINGTON, D. C., June 7.—The
Weather Bureau's weekly summary of
crop conditions says:
As a whole, there has been quite a decided improvement in the condition of
cotton over nearly the whole of the cottion belt. The crop has, however, suffered some damage in Oklahoma and Indian
Territories from overflow and from insufficient moisture in scattered localities in
Louisiana. Rapid growth and a good
state of cultivation are generally indicated. Boll weevils are increasing rapidly and doing considerable damage in a
number of southwestern and south-central counties in Texas.

The week has been exceptionally favorable for transplanting tobacco, and
this work has advanced satisfactorily,
having been completed in Tennessee and
North Carolina and about three-fourths
finished in Kentucky and Virginia.

In the extreme Northern States there is
an encouraging outlook for appies, but in
the Central Mississippi and Ohio valleys
and Middle Atlantic States the prospects appear to be somewhat impaired by
extensive droppins. In the Southern
States a good crop of peaches is indicated.
